**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2, 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Boyko (Pub No US 2003/0140610 A1).

Boyko discloses:

Claim 1:

A rotary lawn mower comprising:

a frame supported by front wheels and at least one rear wheel for movement over the ground',

at least one rotary cutting deck assembly', and

a lifting system coupling said at

least one rotary cutting deck

assembly to said frame, said lifting system operable to lift and pivot said at least one rotary cutting deck assembly about a generally vertical axis between a first position generally below said frame and a second position generally to a side of

Art Unit: 3671

said frame.

and

Claim 8. A rotary lawn mower comprising:

a frame supported by a plurality of wheels for movement over the ground;

a rotary cutting deck assembly;

a support bracket assembly pivotally coupled to said frame for movement about a generally vertical axis;

a telescoping arm pivotally coupled between said support bracket assembly and said rotary cutting deck assembly, said telescoping arm being adjustable into at least two lengths, and

an actuator pivotally coupled between said support bracket assembly and said telescoping arm, said actuator operable to move said rotary cutting deck assembly between a non-cutting position and a cutting position and further capable of retracting said telescoping arm between said at least two lengths.

(ref 3, 5 or 105, 7 or 107; capable of pivoting & swing out about VMA and/or VTA; see also the Abstract; paragraph 27; fig 1)

claim 2:

system comprises:

a support bracket assembly pivotally coupled to said frame for movement about said generally vertical axis;

Art Unit: 3671

a telescoping arm pivotally coupled between said support bracket assembly and said at least one rotary cutting deck assembly', and an actuator pivotally coupled between said support bracket assembly and said telescoping arm, said actuator operable to move said at least one rotary cutting deck assembly between a non-cutting position and a cutting position. (fig 2, ref 9, 10, 11).

***Allowable Subject Matter***

3. Claims 14-18 are allowed.
4. Claims 3-7, 9-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3671
